

ABC Technologies - Official Company Policy Document
Document Version: 2.1 | Department: Legal and Operations

Section 1: Introduction and Scope

This document outlines the operational policies, refund procedures, and service level agreements (SLAs) for all customers utilizing ABC Technologies' SaaS products. By utilizing our services, customers agree to adhere to these policies.

Section 2: Subscription and Refund Policy

ABC Technologies strives for 100% customer satisfaction, but to maintain operational stability, our refund policies are strictly enforced:

2.1 Monthly Subscriptions: We do not offer refunds, prorated or otherwise, for any monthly subscription plans. Cancellation will simply prevent the next billing cycle from triggering.

2.2 Annual Subscriptions: Customers may request a full refund for an annual subscription ONLY if the request is made within 14 days of the initial purchase or the annual renewal date.

Requests made after 14 days will not be honored, and the subscription will remain active until the end of the yearly billing cycle.

2.3 High-Risk Actions & Approval Requirement: To prevent fraud and ensure proper account handling, all refund requests, subscription cancellations, account closure requests, and compensation claims are classified as "High-Risk." These actions cannot be automated and MUST be escalated, reviewed, and approved by a human billing supervisor before any processing occurs.

Section 3: Data Security and Privacy

ABC Technologies is fully compliant with GDPR and CCPA regulations. Customer data is encrypted at rest using AES-256 and in transit using TLS 1.3. We do not sell customer data to third-party brokers. In the event of an account closure, all associated data is permanently purged from our servers within 30 days.

Section 4: Service Level Agreement (SLA) & Compensation

We guarantee a 99.9% uptime for Professional and Enterprise plans.

4.1 Scheduled Maintenance: Maintenance will be announced 7 days in advance and does not count against uptime metrics.

4.2 Unplanned Downtime Compensation: If a customer experiences consecutive unplanned service downtime exceeding 48 hours, they may request service credit compensation equal to one month of their current subscription tier. These requests require direct management escalation and approval.
